**Above is an example of a properly layed-out prop table and backstage storage space.**

**Some things to note, as you complete your prop list and layout your 2D table.**

1. Each prop has its own box/area/outline
2. Each prop is clearly labeled
3. Like props are placed near eachother
4. Props are easy to see and reach.
5. Large items, like the arm chair, are placed on the floor next to the table but still labeled and placed in a specific box.
